The River Canyon Total Return Bond Fund (RCTIX) is an actively managed, diversified portfolio of structured credit securities and other fixed income instruments, that strives to identify high-quality, relative value opportunities. RCTIX seeks to maximize total return, with an emphasis on downside risk mitigation.

Why Invest in RCTIX

- **Experienced portfolio manager** with 18 years of structured product experience within multiple investment vehicles.
- **Outperformed** the benchmark over multiple market cycles.
- **Research-based process** with progressive technical and fundamental underwriting tools
- **Breadth of coverage** among 40 sectors and 200 sub-sectors within the \$13 trillion structured credit universe
- **Nimble portfolio** that is large enough to execute, yet small enough to be discriminating

River Canyon's Heritage Dates to 1990

In 2013, Canyon Partners — a global alternative investment manager with more than \$26 billion in AUM as of 12/1/2021 — established River Canyon Fund Management as an investment advisor for its more liquid credit strategies. River Canyon's strategies bring to bear the full resources of the Canyon Partners platform, including its research team, trading, legal, risk management and operations.

The fund's benchmark for performance comparison purposes is the Bloomberg US Aggregate Bond Index. The index is an unmanaged index that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage passthrough securities, and asset-backed securities. The table reflects the theoretical reinvestment of dividends on securities in the index. The impact of any transaction costs and the deduction of expenses associated with a mutual fund, such as investment management and administration fees, are not reflected in the index calculations. It is not possible to invest directly in an index.

* River Canyon Fund Management LLC (the "Adviser") has contractually agreed to waive fees and reimburse expenses to the extent that Total Annual Fund Operating Expenses (excluding brokerage costs, interest, taxes, dividend expense on short positions, litigation and indemnification expenses, expenses associated with investments in underlying investment companies, and extraordinary expenses) exceed 0.65% until January 28, 2022. The Net Expense Ratio is 0.68% as of December 31, 2021.

** The 30-Day SEC Yield represents net investment income earned by the Fund over the 30-Day period ended 12/31/2021, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-Day period. The 30-Day unsubsidized SEC Yield does not reflect any fee waivers/reimbursements/limits in effect.

*** Upside/downside capture ratio shows whether a given fund has outperformed--gained more or lost less than--a broad market benchmark during periods of market strength and weakness, and if so, by how much. If a fund generates positive returns, however, while the benchmark declines, the fund's downside capture ratio will be negative (meaning it has moved in the opposite direction of the benchmark).

Duration is a calculation of the average life of a bond (or portfolio of bonds) that is a useful measure of the bond's price sensitivity to interest rate changes. The higher the duration number, the greater the risk and reward potential of the bond.

Volatility represents standard deviation, a statistical measure of distribution around an average, which depicts how widely returns varied over a certain period of time. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.

Sharpe Ratio is a to determine reward per unit of risk. The greater a fund's Sharpe ratio, the better its risk-adjusted performance has been.

CMBS: Commercial Mortgage-Backed Securities

RMBS: Residential Mortgage-Backed Securities

CLO: Collateralized Loan Obligation

ABS: Asset Backed Securities

Investment Risks

It is important to note that the fund is not guaranteed by the U.S. Government. Fixed income investments involve interest rate risk, issuer credit risk and risk of default, and price volatility risk. Funds investing in bonds can lose their value as interest rates rise, and investors participating in such Funds can suffer a partial or total loss of their principal. The fund invests in asset backed and mortgaged backed securities which may be more volatile than other fixed income securities and influenced by the housing markets or markets from which the collateral is drawn. For a more complete list of fund risks, please see the Prospectus.

Diversification does not assure a profit, nor protect against loss in a declining market.

Morningstar Rating™ as of 31 December 2021 for the Inst. series; other classes may have different performance characteristics. The River Canyon Total Return Bond Fund was rated against the following numbers of Short-Term Bond funds over the following time periods: Overall 5 Stars (557 funds rated); 3 Yrs. 5 Stars (557 funds rated); 5 Yrs. 5 Stars (478 funds rated). Past performance is no guarantee of future results. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50%10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. © 2021 Morningstar. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Morningstar's percentile ranking is based on the highest (or most favorable) percentile rank of 1 and the lowest (or least favorable) percentile rank of 100. Past performance is no guarantee of future results.

Moody's assigns a rating of AAA as the highest to C as the lowest credit quality rating. S&P assigns a rating of AAA as the highest to D as the lowest credit quality rating. Not Rated Securities consists of securities not rated by either agency. Credit quality ratings are subjective opinions of the credit rating agency and not statements of fact and are subject to change. Credit quality ratings reflect the credit quality of the underlying securities in the Fund's portfolio and not that of the Fund itself.

The River Canyon Total Return Bond Fund is offered only by prospectus. The prospectus contains important information, including investment objectives, risks, advisory fees and expenses.
